

Tour 6 „Franconian Switzerland“ (Tourguide Kudi?)

It takes a little while to get from Grabfeld to biker's paradise but the outstanding scenery is worth the trouble. Unspoilt nature, sometimes from its endearing side, sometimes rather harsher, and worth a journey of discovery at any time of the year.

Half-timbered houses welcome bikers who have enough stamina to ascend the various hills, the river Wiesent invites fishers, kayak drivers and canoeists. Hiking along magnificent paths with distant views down into the valley, cycling along lonely, curving roads past idyllic half-timbered cottages, free-climbing, ... The Franconian Switzerland is the region with the highest brewery density in the world.
